

I am a chemist graduated from science university five years ago since that time I worked as a quality engineer and lab chemist in company for chocolate , biscuits, cocoa and confectionary which make me so excited to know more information about this field especially in this work I use my science to improve the quality of the food which save the health of people

I married a mechanical engineer who live in Essen (NRW) study his master in Duisburg -Essen university after he worked with me in the same company as an industrial engineer and I actually waiting come to Germany(Especially I waiting the acceptance from foreign office to give me the visa for family reunion) to continue my knowledge and increase it in the same field which I worked in it and so interested in it so much due to through my work in this specialization I feel like a travel in the imagination world by the experiments & colors and micro biological tests.

My husband who told me about the quality of the juice of your company and through our follow to the company we found that we may have a chance to work in the huge company like your company which actually will be an excellent experience in this field

I look forward to be an effective member of your team.
