1 Module Description

The Paymorrow Payments module handles the payment methods invoice and direct debit with guarantee of Paymorrow GmbH and is being developed and deployed by OXID eSales. In this way shop operators are protected against payment defaults, as the payment request is verified and confirmed in advance.

Module title: Paymorrow Payment
Version: 2.0
Category: OXID eFire Extension – Payment in the online shop
Manufacturer: OXID eSales AG
                       Internet: www.oxid-esales.com
                       E-mail: info@oxid-esales.com

For questions about Paymorrow products as well as support for module installation & setup, please contact Paymorrow.

- Product Consulting: beratung@paymorrow.de
- Technical Customer Service: technik@paymorrow.de
- URL: https://paymorrow.de

The Paymorrow Payments module was designed by OXID eSales in cooperation with Paymorrow.

2 System requirements

The system requirements given below apply to the Paymorrow Payments module.

- PHP >= 5.3
- cURL
- OpenSSL

3 Installation

In this chapter, the installation of the Paymorrow Payments module for the OXID eShop version 6.0.0 is described. Follow this guide step by step.

If the shop was set up as an OXID eShop Compilation, the matching version of Paymorrow Payment is already integrated. It simply has to be activated and configured via the admin panel. In case that the module has to be manually integrated into the shop please take a look at the README.md file of the module.

The technical customer service of Paymorrow also offers you a free module integration and set-up service. Please use the following contact information for communication with Paymorrow:
E-mail: technik@paymorrow.de & phone: +49 721 / 480 84 30

For contract partners, OXID eSales can carry out the installation of the module. The OXID eSales support can be reached via e-mail at support@oxid-esales.com.

3.1 Multi-Shop & -Language

If you have many sub-shops and more languages than English and German, please see comments in */modules/oxps/paymorrow/docs/install.sql* to install all CMS snippets manually.

3.2 Activate Module

The module Paymorrow Payments should now be activated in the shop backend. Go to the shop backend to **Extensions** -> **Modules** and select the module. In the **Overview** tab, press the **Activate** button. By activating the module the database commands from */modules/oxps/paymorrow/docs/install.sql* are executed automatically.

3.3 Delete Temporary Files

Clear the cache by removing */tmp* folder content (all files except *.htaccess*).

4 Configuration

In order to enable payment via Paymorrow Payments for customers in the OXID eShop, the related module needs to be configured.

4.1 API-Configuration

Configuration of the Paymorrow Payments module in the admin panel:
Extensions -> **Modules** -> **Paymorrow Payments** -> **Settings [tab]** -> **API Configuration**

- Request your personal **Webservice User** and **Initialization Code** for the certificate registration via email to technik@paymorrow.de (live and/or test)
- Enter the Paymorrow **Webservice User** (live and/or test)
- Save the changes
- Then **„Live/Test Register Certificates"** buttons will appear
- Use the Live or Test button to open a window where you enter the **Initialization code** and generate the certificate. **The Initialization Code is supplied by Paymorrow and is a one-time code to generate a certificate**

4.2 Configure Payment Methods In Shop

Mapping of the payment methods invoice and direct debit in the admin panel:
Shop Settings -> **Payment Methods** -> ***any payment method available*** -> **Paymorrow [tab]**

- Activate a payment method as Paymorrow and press **Save**
- Choose payment method type and configure **Paymorrow** tab
- If there are no errors in the form save it
- Make user group and country assignments (see **Main** and **Country** tab)

Figure 1: Admin panel, payment methods

4.3 Adjust Shipping Methods For Paymorrow In The Shop

Adjust all shipping methods, which are in use via **Shop Settings** -> **Shipping Methods** and assign them to the appropriate payment methods, countries, shipping cost rules and user groups.

5 Functional Description

5.1 Paymorrow Payments In The Checkout Process

Depending on the configuration of the Paymorrow Payments module, payment via invoice and direct debit is enabled during checkout step 3. At this time, the user is already logged in to the shop or shopping without registration. If the Paymorrow Payments module detects that any user data is missing, the user is required to enter the missing information.

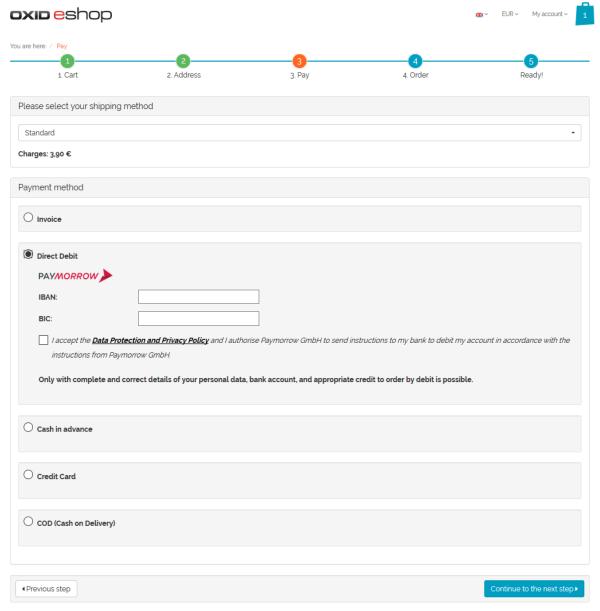

Figure 2: Checkout, order step 3, direct debit

Figure 3: Checkout, order step 3, invoice

When the user continues to the next checkout step, the payment request is verified and confirmed in advance, e.g. by checking the credit rating of the customer.

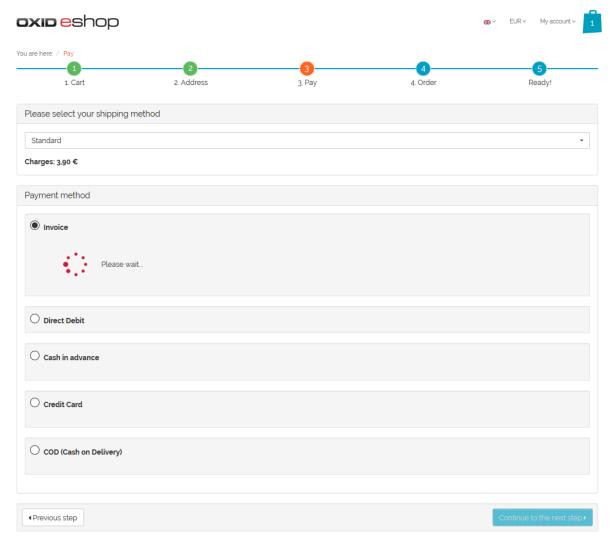

Figure 4: Checkout, order step 3, payment request validation

5.2 Paymorrow Payments For Orders

If products have been paid via a payment method mapped with Paymorrow Payments, a history of orders can be found in the admin panel. Therefore go to **Administer Orders** -> **Orders**. You can also find an overview of orders on the **Paymorrow Merchant Portal** (`https://paymorrow.net/perthPortal/)`). Contact Paymorrow GmbH in case you didn't yet receive username and password.
